

Klickitat PUD Offers Rebates on Conservation Measures

Our new rebate program is here! Do you have drafty windows? Would you like to make your home warm and cozy with insulation and a heat pump, while saving on your electric bill?

Klickitat PUD would like to help you.

On January 30, Klickitat PUD's Board of Commissioners adopted our new Conservation Rate Credit (CRC) program. The CRC program through Bonneville Power Administration (BPA), allows

Klickitat PUD to offer rebates on conservation measures for residential, commercial and—new this year—the agriculture sector.

The new CRC program will run from January 1, 2007, to September 30, 2009, as funds permit, first come first served.

Before you start your project or make a purchase, contact Klickitat PUD's Energy Services Department for eligibility requirements. Each measure has certain specifications and limits to meet before a

rebate can be issued.

Need financial help with your project? No need to put it off any longer. Klickitat PUD continues to offer its customers 4.9-percent low-interest loans for the installation of conservation measures.

Call Sharon Ohnstad in our Energy Services Department (509) 773-7622 for information and specifications on our new program and loans. ■

Residential and Commercial Rebates are offered on:

Clothes Washers: Energy Star® — \$60 to \$70 pending MEF rating

Heat Pumps — up to \$800

Duct Sealing — \$300

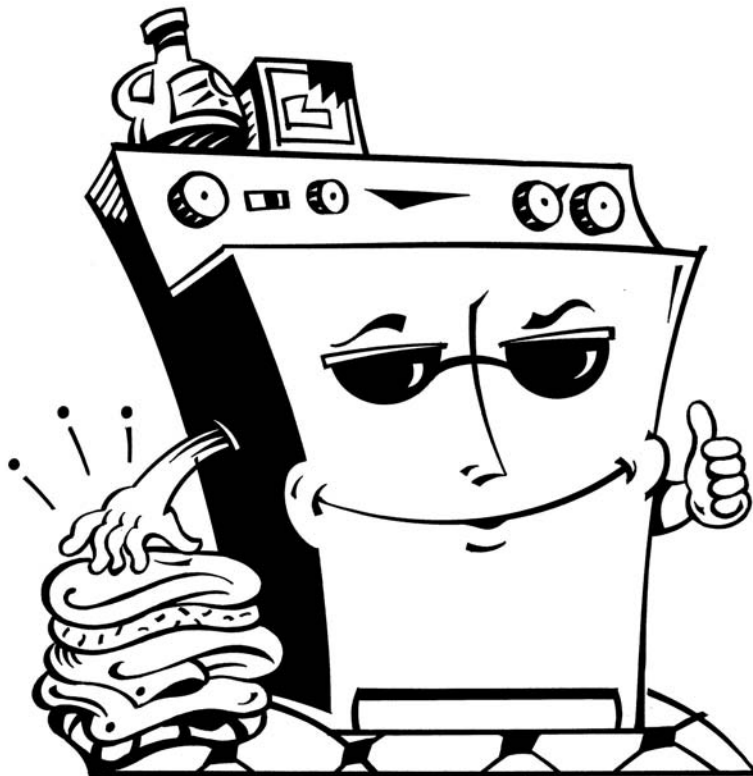

Insulation — 25 cents to 57 cents per square foot

Windows — \$1.50 per square foot

Solar — \$400 per kilowatt up to 3 kilowatt \$1,200

Irrigation — 70 cents to \$87.50

Commercial Lighting — Retrofits from \$5.60 to \$21 (per lamp)
