

Philosophy of Water-Wastewater System Management

KPUD is proud you chose us for this task. We are committed to:

- Operating all systems at a high standard, with minimum administrative overhead.
- Allowing your community maximum control of the system.
- Maintaining economic viability of each system.
- Maintaining the financial separation of each system KPUD operates.
- Complying with all laws and rules applicable to water-wastewater systems.
- Providing highly qualified state-certified system operators.
- Addressing community water needs to limit individual well-drilling that could affect water tables or water quality; not using the systems as tools of growth management.
- Developing all systems to remove any operating constraints or moratoriums.
- Serving communities when requested and whenever possible.

We know your community has a choice of which operator you want to run your system(s). We hope you continue to choose KPUD as your system operator. ■

Leave the Tree Trimming to Us

You love those beautiful, old trees that have been in your yard for generations. But when they start growing too close to the power lines and knock out the electricity, they are inconvenient and even dangerous.

Call Klickitat PUD at (509) 773-5891 or (800) 548-8357 toll free if your trees are getting dangerously close to power lines.

Cutting branches near an overhead line is NOT for do-it-yourselfers. Klickitat PUD crews are trained to work safely around live power lines and know how to preserve the health and beauty of your trees. ■
