

Enrolling in Klickitat PUD's Net Energy Metering Program

Klickitat PUD continues to voluntarily support customer choice and alternative sources of energy by offering an interconnection of a Net Energy Metering program that allows individual customers who generate their own electricity from solar power and other approved generating facilities of 100 kW or less to feed electricity they do not use back into the grid.

Our Net Energy Metering program and Policy Bulletin 25 updated September, 22 2020 is available for new participants with approved generating facilities. This program is intended primarily to offset part or all of the customer-generator's own electrical requirement. Participants must comply with the terms and conditions of Policy 25 Interconnection Standards, approved Interconnection Agreement, and other supporting policies and documents.

For further explanation or questions contact our Energy Services Department at (509) 773-7622. Forms also available at www.klickitatpud.com
