## Water Use Efficiency Program

### WUE Program Goals and Measures

Water system owners, managers, and operators work hard to provide safe and reliable drinking water to their customers. However, working to protect this natural resource is everyone's responsibility. The **Water Use Efficiency Program** was created by Washington Law, as a plan for each water system to implement water saving activities. Part of the plan requirements are to adopt customer goals.

In 2016 the Board of Commissioners approved Water Use Efficiency Goals for each community.

The **Bickleton** Water System WUE goal adopted from 2016-2022 is to maintain distribution leakage to less than 10% per year for this water system.

KPUD will monitor customer usage to identify leakage problems on the customer side. This is a fairly common issue when customers are metered for the first time.

Water-Saving tips from [ecomena.org/water-conservation](http://ecomena.org/water-conservation)

Water your yard and outdoor plants early or late in the day to reduce evaporation.

Use a shut-off nozzle on your hose.

Use plants that require less water.

Mulch around plants to hold water in the soil.

Get an Energy Star labeled washing machine.

Wash only full loads.

Use a low flow showerhead.

Take shorter showers — five minutes or less is best.

Turn off the water while soaping hands and brushing teeth.

Turn off sink faucet while scrubbing dishes and pots.

Install new toilets that use less than 1.6 gallons per flush.

Put faucet aerators on sink faucets.

Use a broom, not a hose, to clean driveways and walkways.
