Water Use Efficiency Program

WUE Program Goals and Measures

Water system owners, managers, and operators work hard to provide safe and reliable drinking water to their customers. However, working to protect this natural resource is everyone's responsibility. The **Water Use Efficiency Program** was created by Washington Law, as a plan for each water system to implement water saving activities. Part of the plan requirements are to adopt customer goals. In 2016 the Board of Commissioners ap-

proved Water Use Efficiency Goals for each community.

The **Glenwood** Water System WUE goal adopted from 2016-2022 is to maintain distribution leakage to a 3 year average of 15% or less and to reduce per connection consumption by 15 gallons per day. The customers are relied upon to use water responsibly. There are many ways to conserve water both inside and outside the home. Please contact the KPUD Water De-

Caring for Nine Rural Water & Six Waste Water Systems throughout Klickitat County

Water-Saving tips from ecomena.org/water-conservation

Water your yard and outdoor plants early or late in the day to reduce evaporation.

Use a shut-off nozzle on your hose.

Use plants that require less water.

Mulch around plants to hold water in the soil.

Get an Energy Star labeled washing machine.

Use a low flow showerhead.

Wash only full loads.

Take shorter showers — five minutes or less is best.

Turn off the water while soaping hands and brushing teeth.

Turn off sink faucet while scrubbing dishes and pots.

Install new toilets that use less than 1.6 gallons per flush.

Put faucet aerators on sink faucets.

Use a broom, not a hose, to clean driveways and walkways.
