Water Use Efficiency Program

WUE Program Goals and Measures

Water system owners, managers, and operators work hard to provide safe and reliable drinking water to their customers. However, working to protect this natural resource is everyone's responsibility. The **Water Use Efficiency Program** was created by Washington Law, as a plan for each water system to implement water saving activities. Part of the plan requirements are to adopt customer goals. In 2016 the Board of Commissioners approved

Water Use Efficiency Goals for each community.

The **Wishram** Water System customer goal adopted for 2016-2022 is to maintain a 3 year average per connection consumption of 320 gallons daily in the community. The customers are relied upon to use water responsibly. There are many ways to conserve water both inside and outside the home. Please contact the KPUD Water

Water-Saving tips from ecomena.org/water-conservation

Water your yard and outdoor plants early or late in the day to reduce evaporation.

Use a shut-off nozzle on your hose.

Use plants that require less water.

Mulch around plants to hold water in the soil.

Get an Energy Star labeled washing machine.

Wash only full loads.

Use a low flow showerhead.

Take shorter showers — five minutes or less is best.

Turn off the water while soaping hands and brushing teeth.

Turn off sink faucet while scrubbing dishes and pots.

Install new toilets that use less than 1.6 gallons per flush.

Put faucet aerators on sink faucets.

Use a broom, not a hose, to clean driveways and walkways.
