

Lyle Water Use Efficiency Program

Klickitat PUD 2024

WUE Program Goals and Measures

Water system owners, managers, and operators work hard to provide safe and reliable drinking water to their customers. However, working to protect this natural resource is everyone's responsibility.

The Water Use Efficiency Program was created by Washington Law, as a plan for each water system to implement water saving activities. Part of the plan requirements are to adopt customer goals.

In 2022 KPUD Board of Commissioners approved Water Use Efficiency Goals for each community.

The new **Lyle** Water System customer goal adopted for 2022-2028 is to reduce annual water consumption per connection to 275 gallons per day even as growth occurs in the community.

Water-Saving tips below from:
www.ecomena.org/water-conservation

Water your yard and outdoor plants early or late in the day to reduce evaporation.

Use a shut-off nozzle on your hose.

Use plants that require less water.

Mulch around plants to hold water in the soil.

Get an Energy Star labeled washing machine.

Use a low flow showerhead.

Wash only full loads.

Take shorter showers — five minutes or less is best.

Turn off the water while soaping hands and brushing teeth.

Turn off sink faucet while scrubbing dishes and pots.

Install new toilets that use less than 1.6 gallons per flush.

Put faucet aerators on sink faucets.

Use a broom, not a hose, to clean driveways and walkways.
