

Roosevelt Water Use Efficiency Program

Klickitat PUD 2024

WUE Program Goals and Measures

Water system owners, managers, and operators work hard to provide safe and reliable drinking water to their customers. However, working to protect this natural resource is everyone's responsibility.

The **Water Use Efficiency Program** was created by Washington Law, as a plan for each water system to implement water saving activities. Part of the plan requirements are to adopt customer goals.

In 2022 KPUD Board of Commissioners approved Water Use Efficiency Goals for each community.

The new **Roosevelt** Water System customer goal adopted for 2022-2028 is to reduce per connection consumption 3 year average to 320 gallons or less per day even as growth occurs in the community.
